## Census 2000 P.L. 94-171 Data Release

On March 21, 2001 the U.S. Census Bureau delivered to the Governor and the majority and minority leaders of the Utah Legislature the official Census 2000 Redistricting Data Summary File. Under Public Law 94-171, the Census Bureau is required to provide each state small area population counts within one year of census day.

The Census 2000 redistricting file consists of four tables: the first shows the population of each of 63 single and multiple racial categories; the second shows the total Hispanic or Latino population and the population not Hispanic or Latino crosstabulated by 63 race categories. These tabulations are repeated in the third and fourth tables for the population 18 years and over.

#### State of Utah

Utah's April 1, 2000 population reached 2,233,169. This represents a population increase of 510,319 persons, or 29.6% from 1990, ranking Utah fourth among states in the rate of population growth from 1990 to 2000. Utah grew more than twice as fast as the U.S. (13.2%) during this ten year period.

Utah, as well as four of its neighboring states, ranked as the five fastest growing states in the country during the last decade. They include: Nevada (66.3%), Arizona (40.0%), Colorado (30.6%), Utah (29.6%), and Idaho (28.5%).

Utah continues to have the youngest population in the country with nearly one-third of the population under 18 years of age.

Population Growth Rates: 1990 to 2000

## Census 2000 P.L. 94-171 Data Release

#### **Utah's Counties**

Largest. Salt Lake County continues to be the state's largest county in the state with a population of 898,387 in 2000, followed by Utah County (368,536), Davis (238,994), Weber (196,533), Cache (91,391), and Washington (90,354) Counties. Daggett County remains the smallest county in the state with a 2000 population of 921.

Three out of every four people in the state live in the northern metropolitan area, including Weber, Davis, Salt Lake, and Utah Counties, where 1,702,450 residents, or 76% of the state's population reside.

Fastest Growing. Summit County was the fastest growing county over the decade, nearly doubling in size and increasing 92%, from 15,518 in 1990 to 29,736 in 2000. Seventy percent of the growth occurred in the unincorporated area of the county.

Washington and Iron County were the second and third fastest growing counties, respectively, in the state during the 1990s. Washington County, with an 86% increase over the decade, grew at nearly three times the state rate. Iron County, grew more than twice the state rate from 1990-2000, with a 63% increase.

Five of the state's fastest growing counties form a ring of high growth around the northern metropolitan counties. These counties include Summit (92%); Tooele (53%); Wasatch (51%); Juab (42%); and Sanpete (40%).

Among the other fastest growing counties in the state are Utah (40%); Daggett (34%); and Cache (30%) Counties. Carbon County, with a growth rate of just 1% over the decade, was the slowest growing county in the state.

#### **Utah's Cities**

Largest. Salt Lake City continues to the state's largest city in the state with a 2000 population of 181,743, followed by West Valley City (108,896); Provo (105,166); Sandy (88,418); Orem (84,324); Ogden (77,226); West Jordan (68,336); Layton (58,474); Taylorsville (57,439); and St. George (49,663).

Fastest Growing. The City of Draper lead the way among the state's largest cities (greater than 9,000). Draper more than tripled in size from 1990-2000, increasing 18,000 people, or 248%. Several other of the state's largest cities doubled in size over the decade, including South Jordan (141%); Lehi (125%); Riverton (122%); and Syracuse (102%).

## Race and Hispanic Origin Data

As a result of the revised standards for collecting data on race and ethnicity issued by the Office of Management and Budget in 1997, Census 2000 was the first national census in which respondents were allowed to select more than one race. The six race categories for Census 2000 are White; Black or African American; American Indian or Alaska Native; Asian; and Native Hawaiian or Other Pacific Islander; and a Some Other Race category. (In 1990, Asian and Pacific Islander was a single race category). Respondents that selected more than one race are included in the "Two or More Races" category.

While allowing respondents to report more than one race may provide a more accurate representation of the racial diversity of the country, it also means that data on race from Census 2000 are not directly comparable with data from the 1990 Census and previous censuses. Other factors also affect comparability of the 1990 and 2000 data on race. For example, in 2000 the question on Hispanic or Latino origin was placed before the question on race, but in 1990 the order of these questions was reversed. This may have affected reporting on both questions.

#### Utah's Hispanic Population

The Hispanic population in Utah increased from 84,597 in 1990 to 201,559 in 2000, a 138% increase. While Hispanics make up 9% of Utah's population, they account for 12.5% of the population nationwide.

Counties in Utah with the highest percent of Hispanics compared to their total population include: Weber (13%); Salt Lake (12%) Carbon (10%); and Tooele (10%) Counties. Cities with the highest percentage of Hispanics include: Wendover (69%); Ogden (24%); South Salt Lake (22%); East Carbon (21%); Midvale (21%); and Moroni (21%).

#### Utah's Population by Race

The majority of Utahns (97.9%) selected only one race in 2000. Among those that selected a single race, the majority were White (89.2%), followed by Asian (1.7%), American Indian and Alaska Native (1.3%), Black or African American (0.8%), Native Hawaiian or Other Pacific Islander (0.7%), and Some Other Race (4.2%). Also among those selecting a single race, 89.6% were Non-Hispanic, with 85.3% identified as White Non-Hispanic.

Only 2.1% of Utahns selected more than one race on the 2000 questionnaire compared to 2.4% nationally. The majority of respondents in Utah that selected two races in 2000 identified themselves as White in combination with Some Other Race, followed by White in combination with American Indian or Alaska Native, and White in combination with Asian.

## **Additional Information**

The Census 2000 PL data is available through American FactFinder on the Census Bureau's web page at: http://factfinder.census.gov/servlet/BasicFactsServlet. The State Data Center has also posted Utah Census 2000 data (available in pdf and excel files) on the DEA web page at: http://www.governor.state.ut.us/dea/. You can also contact State Data Center staff at (801) 538-1036.

## Current Economic Conditions and Outlook

#### **Employment Growth**

Utah's non-farm job growth continues to moderate and remains below its long-term historic (1950 to 1999) average annual rate of 3.6%. According to the Utah Department of Workforce Services, the year-over job growth rate peaked at 6.3% in the 3rd quarter of 1994, and has declined thereafter to 2.2% in the 3rd quarter of 2000. During this quarter, construction had the lowest growth rate at a negative 2.9% for a loss of 2,500 jobs, whereas services, at 5.4%, added the most year-over jobs to the economy (16,500). Manufacturing had a -1.1% growth rate for a loss of 1,400 year-over jobs.

If the nation enters a recession the decline in consumption spending due to the wealth effect will be less in Utah than for the nation as a whole, and interest rates should continue to drop. The last time the nation entered a recession (July 1990 to March 1991), and interest rates dropped, Utah fared relatively well. Employment growth decreased 1.1% for the nation in 1991, but increased 3% in Utah.

According to Regional Financial Associates (RFA), Utah ranked 7th in the U.S. in total nonagricultural job growth at 2.4% for December 2000 compared to December 1999. Total employment growth in Utah is expected to average 2.6% in 2000 and decline to 2.4% in 2001, as shown on the adjacent economic indicators table. National job growth, by comparison, is expected to average 2.0% in 2000 and 0.7% in 2001 according to WEFA (a national economic consulting firm).

## The Stock Market (Wealth Effect) and the Utah Economy

RFA reports that for every \$1 gain in stock market values, consumer spending increases by 4 cents.

And, for every \$1 drop in stock market values, consumer spending decreases by 7 cents. The wealth effect<sup>1</sup> is much more potent when stock prices are falling. This is because "baby boomers" will curtail their spending more significantly if their retirement nest egg is eroding.

According to the Division of
Research and Statistics at the
Federal Reserve Board,
consumption spending increased
by 1% to 2% each year between
1995 and 1999 due to the wealth
effect.

The Federal Reserve reported that household net worth (assets less liabilities) declined in 2000 for the first time since it began keeping records in 1952. The decline in household net worth was due to falling stock market prices. Utah's exposure to the wealth effect is less than the national average. This is because mutual fund holdings per household (Utah ranks 31st), and capital gains as a percent of wages (Utah ranks 36th), are less in Utah than the national averages.

<sup>1</sup>The wealth effect is the change in consumption due to a change in household wealth (income plus assets).

The Demographic and Economic Analysis (DEA) section supports the mission of the Governor's Office of Planning and Budget to improve decision-making by providing economic and demographic data and analysis to the governor and to individuals from state agencies, other government entities, businesses, academia, and the public. As part of this mission, DEA functions as the lead agency in Utah for the Bureau of the Census' State Data and Business and Industry Data Center (SDC/BIDC) programs. While the 36 SDC and BIDC affiliates listed in this newsletter have specific areas of expertise, they can also provide assistance to data users in accessing Census and other data sources.
